

## Ezy Switch

- Simple installation and control via text message
- Monitor multiple devices
- Works on all mobile networks

### Remotely control and monitor your heating, security systems, and domestic / commercial appliances.

Ezy Switch is a simple switch control design that connects to electrical devices. If your appliance or equipment can be switched on or off, you can control it remotely from your mobile phone with Ezy Switch!

## **Control your heating, security, and appliances all from your mobile phone... at home, at work, wherever you are.**

### **Simple installation and control via text message**

The Ezy Switch employs the SMS network and comes with easy programming steps. Simple text messaging instructions are used for operation, such as "turn on heat pump" and "turn off heat pump"

### **Monitor multiple devices**

Monitor your security lights and smoke alarms on one Ezy Switch, at the same time control the power on/off on your heat pump and hot water cylinder. Capacity of up to 8 monitored devices and 4 power controlled devices.

### **Multiple users**

A primary mobile phone user is nominated at installation. Up to 12 mobile phone users can be added by a simple text message.

### **Works on all mobile networks**

Uses a globally compliant cellular module.

### **Applications**

With Ezy Switch, the applications are endless!

#### **Have a Security System?**

Save on monthly monitor fees by receiving your own monitor notifications via text to your mobile.

#### **Own a Holiday Home?**

Avoid waiting hours for your hot water to heat up when you arrive. With Ezy Switch you can plan your trip easily by remotely turning on your heating and hot water, welcoming you to a warm home when you arrive.

#### **Work Rurally?**

Not sure if the water pump has come on? Save yourself the travel time and monitor farm machinery and milk sheds remotely, whether you are on or away from the farm.
